Overall Progress Narrative:

The City of Warwick continues to work on the Buckeye Brook/Warwick Pond restoration project - designed to reduce flooding of private property and City infrastructure adjacent to Buckeye Brook/Warwick pond.

During the past quarter, the Office continued to work with the environmental consultant to evaluate potential changes/improvements/updates to the bid documents in a means of achieving cost savings. The Office continues to negotiate with a private property owner that is willing to accept the excavated material to be used as landfill cap material. This usage is contingent on RI DEM approval, which the owner is attempting to receive. As of this QPR, the Owner & RIDEM have not yet come to an agreement on allowing the use of the Phragmites as fill. The City reached out to the owner and they seem hesitant to continue to push RIDEM for Approval. This alternative site for material disposal seems doubtful. The City has requested a meeting with the RI DOT to discuss utilizing property controlled by the State of RI as a disposal site. Previous attempts have been unsuccessful.

The Office was denied the opportunity to submit an official application to the EPA 2021 Southeast New England Watershed Grant Program. The City is currently applying to RIEMA for a 2022 FEMA HMGP (Hazard Mitigation Program Grant) in the amount of \$1,000,000. The grant provides funds to mitigate the flooding of private property and infrastructure, which fits with the Buckeye Brook Project.

As stated previously, due to the nature and location of the property, and the restrictions placed upon the Office by RIDEM (permitting authority), the allowable period of work to be performed is July 1 - October 31st. The City continues to look for both alternative disposal sites and additional funds to cover the higher than anticipated costs. Due to the constraints of not having a disposal site and limited resources, it is not anticipated that this project would begin before July 2022.

Project Summary

Project #, Project Title	This Report	To Date	
	Program Funds Drawdown	Project Funds Budgeted	Program Funds Drawdown
01 Acquisition, 01 Residential Acquisition	\$0.00	\$0.00	\$0.00

Activity Description:

Funds will be used to make repair and or improvements to public facilities and infrastructure damaged in the March 2010 floods. Funds will be used to flood harden 3 Warwick Sewer Authority pumping stations that were heavily damaged due to flooding. The pumping stations, located in and serving predominately low/mod income neighborhoods, will be hardened to minimize the impact of future storm damage due to flooding. The RFP for flood hardening of the pumping stations is currently out for bid and it is expected that the work will begin immediately upon award of contract. Flood hardening work on the Warwick Sewer Authority pumping stations has been completed as of September 2019. In addition, funds will also be used to restore the natural flow of Buckeye Brook in the area of Lakeshore Drive and Warwick Pond. Vegetation has overgrown and clogged the natural drainage of Warwick Pond and the flow of Buckeye Brook causing persistent flooding of Lakeshore Drive. The RFP for environmental services is currently being prepared and will be awarded in the Spring with work commencing shortly thereafter.
